

PARTIES

Parties consist of creative LEGO® based games and activities led by a Bricks 4 Kidz party host, plus LEGO® Bricks galore to keep the birthday builders happy. We even provide the invitations and thank you notes to ensure a fun and hassle-free experience for kids and parents alike. We offer a variety of packages to fit your party expectations, depending on the number of children, location and duration.

Many themes available: Minecraft, Super Hero, Angry Birds, Animals, and so much more.

SPECIAL EVENTS

Bricks 4 Kidz LEGO®-based activities encourage teamwork to complete our fun, challenging projects. Your child will have the opportunity to collaborate with others to reach an age-appropriate goal, cultivating his or her leadership skills, communication abilities and capacity to see the big picture while also developing individual strengths.

In each of our programs, Bricks 4 Kidz supplies everything from the lesson plans to the Bricks.

- Homeschool
- Family & Kids Night Out
- Scouts

STEM ENRICHMENT

LEGO®-INSPIRED STEM CLASSES FOR KIDS OF ALL ABILITIES ARE DESIGNED TO SPARK INTEREST AND HONE ABILITIES IN THESE CRITICAL SUBJECT AREAS.

SCIENCE

The design of Bricks 4 Kidz programs engages elementary students in illustrating physical science concepts like the laws of motion using LEGO® bricks .

TECHNOLOGY

Our LEGO® robotics, coding and video game design classes help students learn the magic behind their favorite tech through play.

ENGINEERING

Bricks 4 Kidz courses, focused on making things, are a powerful way to ignite a child's imagination. Models based on real-world designs like roller coasters, bridges and towers, show how engineering is the practical application of science.

MATH

Math can be a source of pride and accomplishment for kids, at Bricks 4 Kidz as they are counting, measuring and estimating without even thinking about it.

Bricks 4 Kidz Essex County makes STEM enrichment accessible to all children. When your child participates in our programs, we donate a portion of those proceeds to Nassan's Place. As a 501c3 organization, they are helping to make a difference in the lives of children and families affected by autism in and around under-served communities by providing educational and recreational programs, social outings, and resources.

AFTER SCHOOL PROGRAMS

In these fun, educational classes, students will experience hands-on engineering fundamentals as they build motorized models using LEGO® Bricks. Bricks 4 Kidz® provides a curriculum which introduces children to engineering, architecture and scientific principles. After-school programs allow their imagination and creativity to soar during a free-play building session at the end of each class.

These classes deliver play that's fun, educational and enriching for each child.

PRESCHOOL CLASSES

Using fun, brightly colored DUPLO® Bricks, kids in our STEM classes for preschoolers will learn gross and fine motor skills, build their vocabularies, and strengthen their recognition of colors, patterns and shapes. Our Preschool classes complement ongoing lessons using themes such as animals and the alphabet. Each model is designed to be fun and appealing while making the most of preschoolers' willingness to learn

At Bricks 4 Kidz we love seeing a child's eyes light up when he or she learns something new for the first time.

DROP & SHOP/PLAY DATES

Drop & Shop is Brick-tastic fun for them and tantrum free shopping for you!

At our Livingston Mall location you can "Drop" your kids with our specially trained staff for a 1 to 2-hr LEGO® discovery session, while you enjoy a child-free "Shop"-ping experience.

Play Dates is a time for you and your child to have Bricktastic fun together!

You can turn Drop & Shop into a Play Date and enjoy creative building with your child. You can also participate in a Play Date Workshop just for you and your toddler (18 months to 3 years) to enjoy building together. It's never too early to have Brick-tastic fun while learning all of the following:

- Color Recognition
- Number & Letter Recognition
- Early Sign Language
- Language Development
- Independence
- Sharing
- Cooperation

CAMPS

Kids between the ages of 5 and 13 can spend their vacation time learning about the worlds of engineering, animated movie-making and architecture through hands-on building fun. Under the guidance of experienced teachers, our LEGO®-based engineering camps give kids the chance to apply real-world STEM concepts as they build their own creations. For bonus fun, projects are often tied to popular themes like robotics, space and amusement parks.

Kids discover more about STEM concepts and develop skills like critical thinking, collaboration, innovation, communication and much more!

ONLINE PROGRAMS

Fun activities for children to engage with at home! Share your online building experience with friends and other builders within the same environment.

All online programs are taught live by our certified master builders.

Choose from a variety of online programs all taught online:

- Virtual CAD Design
- ReadyAI
- Coding
- Birthday Parties
